

1. Find two brands of an item, and write the name of the item.
2. Write the price of one of the brands.
3. Write the price of the other brand. (Make sure the packages have the same amount in them.)

Item	First Price	Second Price	Difference
Example: canned pineapple	\$.79	\$ 1.09	\$.30
1. _____			
2. _____			
3. _____			
4. _____			
5. _____			
6. _____			
7. _____			
8. _____			
9. _____			
10. _____			

1. Subtract the lesser price from the greater price and write your answer in the last column. This is the difference between the two prices.

Discuss: why do some brands cost more than others?
